

1. Record Nr.	UNINA9910954236303321
Titolo	Exergy analysis and design optimization for aerospace vehicles and systems // edited by Jose A. Camberos, David J. Moorhouse
Pubbl/distr/stampa	Reston, VA, : American Institute of Aeronautics and Astronautics, c2011
ISBN	1-60086-840-1 1-60086-841-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (658 p.)
Collana	Progress in astronautics and aeronautics ; ; v. 238
Altri autori (Persone)	CamberosJose A MoorhouseDavid J <1939-> (David John)
Soggetti	Space vehicles - Design and construction Space vehicles - Thermodynamics Aerospace engineering Exergy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Cover""; ""Title""; ""Copyright""; ""Foreword""; ""Contents""; ""Preface""; ""Acknowledgments""; ""Nomenclature""; ""Chapter 1 Introduction""; ""Chapter 2 Fundamentals of Exergy Analysis""; ""Chapter 3 Applications of Exergy Analysis""; ""Chapter 4 Integrated Subsystem Analysis Using EntropyGeneration Minimization""; ""Chapter 5 Exergy-Based Design Methodology for Airfoil ShapeOptimization and Wing Analysis""; ""Chapter 6 Entropy Generation and Aerospace VehiclePerformance""; ""Chapter 7 Optimization Using Entropy-GenerationMinimization for Maximum Performance of Hypersonic Vehicles"" ""Chapter 8 Characterization of Aerospace Vehicle Performanceand Mission Analysis Using Exergy""""Chapter 9 Mission-Integrated Synthesis and DesignOptimization (MIS/DO) of Aerospace Vehicles""; ""Chapter 10 MIS/DO Applied to High Performance AerospaceVehicles""; ""Chapter 11 Thermodynamics, Entropy GenerationMinimization, and the Constructal Law""; ""Chapter 12 Quantum Thermodynamics and the Modeling ofNonequilibrium Phenomena: Theory and Future Directions""; ""Chapter 13 Numerical Methods in Light of the Second

Sommario/riassunto

Recognizing a critical need for a holistic approach to systems integration and multidisciplinary analysis and design optimization, the editors pioneered the application of a powerful scientific principle, the second law of thermodynamics, for aerospace engineering.
