Sommario/riassunto	Bloom in Reverse chronicles the aftermath of a friend's suicide and the end of a turbulent relationship, working through devastation and loss while on a search for solace that spans from local bars to online dating and beyond to ultimately find true connection and sustaining love. Things move backwards, from death to life, like a reverse time-lapse video of a dead flower morphing from brittle, scorched entity to floral glory to nascent bud. The poems seek to find those places where the natural world connects to and informs experiences at the core of human relationships, and at times call upon principles and theories from physics and mathematics to describe the complexities of love and loss. It's a book where grief, melancholy, heartbreak, and disillusionment intersect with urban romanticism, hope, possibility, and love. Bloom is all of it, the terrible and the beautiful.

Sommario/riassunto	The volume Questions in Discourse - Vol. 1 Semantics contains a comprehensive overview of the semantic analysis of questions and their role in structuring discourse, next to a series of in-depth contributions on individual aspects of question meanings. The expert contributions offer novel accounts of semantic phenomena such as negation and biased questions, question embedding, exhaustivity, disjunction in alternative questions, and superlative quantification particles in questions. Some accounts are modelled in the framework of inquisitive semantics, whereas others employ alternative semantics, and yet others point to the discourse-structuring potential of marked questions. All

contributions are easily accessible against the background of the general introduction. Together, they give an excellent overview of current trends in question semantics.
