

1. Record Nr.	UNINA9910954370103321
Autore	Wilkinson John
Titolo	Probing the new solar system / / John Wilkinson
Pubbl/distr/stampa	Collingwood, Vic., : CSIRO Pub., c2009
ISBN	9786613155191 9780643099494 0643099492 9781283155199 1283155192 9780643096851 064309685X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (311 p.)
Disciplina	523.2
Soggetti	Astronomy Solar system Outer space Exploration
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Why a new solar system? -- Exploring the planets -- The sun -- Mercury: a hot, old world -- Venus: a hot, cloudy planet -- Earth: a watery, living world -- Mars: the red planet -- The asteroid belt -- Jupiter: the gas giant -- Saturn: the ringed planet -- Uranus: the blue, icy planet -- Neptune: an icy, cold world -- Trans-Neptunian objects -- Overview and the future.
Sommario/riassunto	Discoveries made about our Solar System using ground-based and space probe technology.
