Sommario/riassunto	This publication brings together the final reports of three research projects that explored the effects of investment in health on economic growth, family productivity and poverty alleviation in Latin America and the Caribbean. The projects were carried out in 1998 and 1999 and

were the product of the joint effort of the Pan American Health Organization, the Inter-American Development Bank, the World Bank, the United Nations Development Program and the Economic Commission for Latin America and the United Nations Caribbean.
