Sommario/riassunto

Acknowledging the dual notions of danger and opportunity that present themselves in contemporary social and ecological crises, this book explores how both peace and environmental education can transform the way we think and what we value. The book outlines the link between social violence and ecological degradation and the need to educate for the purpose of achieving social and ecological peace. Specialists in peace and environmental education offer a holistic and integrated approach on educating about these problems and challenges. They also provide educational strategies, such as curricular frameworks and pedagogical innovations appropriate for both formal and informal settings, and case studies and examples that illustrate their application.
