Edizione	[1st ed.]
Descrizione fisica	1 online resource (488 p.)
Altri autori (Persone)	MitchellDonald
Disciplina	616.429
Soggetti	Sarcoidosis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Historical survey, definition and epidemiology -- pt. 2. Etiology, pathology, immunology and genetics -- pt. 3. Investigations -- pt. 4. The heart, pulmonary hypertension, the upper respiratory tract, the airways, and pulmonary fibrosis -- pt. 5. The liver and GI tract, spleen, blood and bone marrow, nervous system, renal and calcium metabolism, and psychiatric aspects -- pt. 6. Skin, eyes, joints and skeletal muscles, superficial lymphadenopathy, and endocrine glands -- pt. 7. Beryllium disease, HIV, and neoplasms -- pt. 8. Childhood sarcoid -- pt. 9. Diagnosis and treatment -- pt. 10. Surgical investigation, management and future research.
Sommario/riassunto	Sarcoidosis represents a major challenge for physicians-not just in respiratory medicine, but across a range of specialties. This book, with a multidisciplinary authorship of the highest standard, presents the most up-to-date thinking on all aspects of the condition, from

epidemiology to clinical manifestations and treatment options. Full coverage is given to both respiratory and non-respiratory aspects. The basic science that underlies the disease and its progression is evaluated in detail, and placed into its correct clinical context. Possible future advances are covered in a concluding sect
