

1. Record Nr.	UNINA9910954528403321
Titolo	Inequality and opportunity : papers from the second ECINEQ society meeting / / edited by John Bishop, Buhong Zheng
Pubbl/distr/stampa	Bingley, : Emerald Group Publishing, 2008
ISBN	9786613683861 9781280773099 128077309X 9781848551350 1848551355
Edizione	[1st ed.]
Descrizione fisica	1 online resource (351 p.)
Collana	Research on economic inequality, , 1049-2585 ; ; v. 16
Altri autori (Persone)	BishopJohn A ZhengBuhong
Disciplina	339.2
Soggetti	Business & Economics - Economics - Macroeconomics Business & Economics - Economic Conditions Political Science - Public Policy - Economic Policy Macroeconomics Welfare economics Equality Poverty
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Equal liberties and the resulting optimum income distribution and taxation / Serge-Christophe Kolm -- Equalizing income versus equalizing opportunity :a comparison of the United States and Germany / Ingvild Almås -- Intergenerational income inequality and dynastic poverty persistence : Germany and the United States compared / Veronika V. Eberharter -- Measuring inequality with ordinal data: a note / Buhong Zheng -- Multidimensional unit- and subgroup-consistent inequality and poverty measures : some characterizations / Henar Díez, Ma Casilda Lasso de la Vega, Ana Urrutia -- Rankings of income distributions : a note on intermediate inequality indices / Coral del Río, Olga Alonso-Villar -- The Bonferroni, Gini, and De Vergottini

indices : inequality, welfare, and deprivation in the European union in 2000 / Elena Bárcena, Luis J. Imedio -- On various ways of measuring unemployment, with applications to Switzerland / Joseph Deutsch, Yves Flckiger, Jacques Silber -- Income mobility in Argentina / Luis Beccaria, Fernando Groisman -- Risk level and inequality preference / Liema Davidovitz -- Inequality and envy / Frank Cowell, Udo Ebert -- Interdependent preferences in the design of equal-opportunity policies / Juan D. Moreno-Ternero -- Higher education and equality of opportunity in Italy / Vito Peragine, Laura Serlenga -- Inequality of opportunity for income in five countries of Africa / Denis Cogneau, Sandrine Mesplé-Somps -- Introduction / John A. Bishop, Buhong Zheng.

Sommario/riassunto

Volume 16 of *Research on Economic Inequality* contains a selection of thirteen papers from the Second Biannual Meeting of the Society for the Study of Economic Inequality, Berlin, July, 2007. This conference brings together both established scholars in the field of income distribution as well as advanced graduate students and new Ph.D's. The multi-day conference provides a forum for over 150 participants to share their work with one another. The papers contained in this volume are selected from a few of the many different sub-fields represented at the conference. As the title suggests a major emphasis of the volume is to collect work on the inequality of opportunity. An additional emphasis of the volume is on inequality measurement issues. Finally, the volume is designed to present work from both senior researchers and as well as emerging scholars. The volume begins with an essay on equal liberties by Serge-Christophe Kolm. The second paper examines the relationship between inequality and envy. The next four papers address the inequality of opportunities. Empirical studies of the equality of opportunity include Africa, Italy, Germany, and the United States. The measurement section also contains four papers. The topics covered in these papers include welfare analysis with ordinal data, unit consistency and multidimensional inequality indices, unit consistency and intermediate inequality indices, and the examination of two newly rediscovered inequality measures originally introduced by Bonferroni and De Vergotini. The volume also includes papers on the intergenerational transfer of income inequality and poverty in the US and Germany, income inequality and mobility in Argentina, the use of experimental methods to understand inequality aversion, and the recognition that measuring unemployment is an ethical problem, not simply an exercise in statistical measurement.
