

1. Record Nr.	UNINA9910954617803321
Autore	Gaston Kevin J.
Titolo	The stucture and dynamics of geographic ranges // Kevin J. Gaston
Pubbl/distr/stampa	Oxford : , : Oxford University Press, , 2023
ISBN	1-383-02441-3 1-299-46174-3 0-19-154585-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (277 p.)
Collana	Oxford series in ecology and evolution Oxford scholarship online
Disciplina	577
Soggetti	Biogeography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index. Previously issued in print: 2003.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Contents; 1 Introduction; 1.1 The case of the green-backed heron; 1.2 Areography; 1.2.1 Necessity; 1.2.2 Opportunity; 1.3 This book; 2 Range edges; 2.1 Introduction; 2.2 Abiotic and biotic factors; 2.2.1 Physical barriers; 2.2.2 Climate; 2.2.3 Other abiotic factors and habitat; 2.2.4 Interspecific interactions-consumers; 2.2.5 Interspecific interactions-competitors; 2.2.6 Interspecific interactions-the consumed; 2.2.7 Multiple factors; 2.3 Population dynamics; 2.3.1 Single populations; 2.3.2 Multiple populations; 2.4 Genetics; 2.5 In conclusion; 3 Range size; 3.1 Introduction 3.2 Extents of occurrence and areas of occupancy3.3 Which range?; 3.4 Species-range size distributions; 3.4.1 Speciation; 3.4.2 Range dynamics; 3.4.3 Extinction; 3.5 Patterns in range size variation; 3.5.1 Taxonomic group; 3.5.2 Terrestrial versus marine systems; 3.5.3 Biogeographic region; 3.5.4 Latitude; 3.5.5 Longitude; 3.5.6 Trophic group; 3.5.7 Body size; 3.5.8 Dispersal ability; 3.5.9 Abundance; 3.5.10 Genetic variation; 3.6 In conclusion; 4 Abundance structure; 4.1 Introduction; 4.2 Intraspecific abundance distributions; 4.3 Intraspecific abundance-range size relationships 4.4 Environmental gradients and response curves4.5 Abundance profiles; 4.5.1 Patterns; 4.5.2 Mechanisms; 4.6 In conclusion; 5

Implications; 5.1 Introduction; 5.2 Range contractions and extinctions; 5.2.1 Niche and contagion models; 5.3 Protected areas; 5.4 Climate change; 5.5 Aliens; 5.6 Reintroductions; 5.7 Final words; Notes; References; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S; T; U; V; W

Sommario/riassunto

No species occurs everywhere. Indeed, the majority are absent from most places and where they do occur they are usually quite rare. This text discusses the structure of these distributions, especially the factors that determine geographic range and related information.
