Sommario/riassunto	This study is an attempt to explain coordinate conjoining as a rule-governed process of establishing specific semantic relations within and between sentences. Coordination is thus conceived of both as a basic device of linguistic complex formation and as a rather fundamental principle underlying the creation of the text. From the point of view of achieving coherence, coordinate conjoining is described in this monograph as an integrative process. Described are the conditions governing this process, the rules according to which take place, in short: the complex interaction of various linguistica
