Soggetti	LITERARY CRITICISM / European / Italian
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Il presente volume intende indagare la tematica dell'ars dictaminis secondo un approccio di impianto codicologico e paleografico, ovvero attraverso lo studio primario delle testimonianze manoscritte che si prefigge di condurre ad una migliore contestualizzazione storica del fenomeno, e di analizzare le strette interrelazioni esistenti tra l'ars dictaminis e il sistema politico e sociale dell'epoca. Apre il volume una introduzione di carattere generale sullo scopo e sulla metodologia adoperata nella ricerca, e sull'importanza di una impostazione codicologica alla questione. Nei due capitoli successivi si individueranno gli aspetti caratterizzanti la produzione e la circolazione manoscritta dettatoria riguardante, rispettivamente, i secoli XIII e XIV, e il periodo umanistico. Segue un quarto capitolo dove si illustreranno, in un'ottica comparativa, le peculiarità della tradizione manoscritta di autori e testi in rapporto con le opere del retore bolognese, come la Brevis introductio ad dictamen di Giovanni di Bonandrea, i trattati morali di Albertano da Brescia e la Piccola dottrina del parlare e del tacere. Concluderanno il volume tavole sinottiche finalizzate a rendere facilmente consultabile l'elenco dei testimoni analizzati.</p> <p>This volume is dedicated to the study of medieval ars dictaminis. Analyzing several manuscript witnesses, it sheds light on the historical contextualization of the phenomenon and examines the close</p>

relationship between ars dictaminis and the political and social system of that time.

Jahrhundert) / Conceptions de l'origine des langues et du langage du XVI au XVIIIe siècle -- Backmatter

SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For "classic" linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the m
