Sommario/riassunto	An international team of over 100 leading scholars has been brought together to provide authoritative exposition of how historys most important philosophical thinkers from antiquity to the present day have sought to analyse the concepts and tenets central to Western religious belief, especially Christianity. Volume 5 comprises an introduction, presenting an overview of Twentieth-Century philosophy of religion, and a series of essays on Twentieth-Century philosophers, including William James, Max Scheler, John Hick, Richard Swinburne, Ludwig Wittgenstein, Emmanuel Heidigger, John Dewey and Karl

Jaspers. Each essay opens with a brief biography, outlines and analyses the philosophers contribution to thinking on religion, and concludes with key further reading. The volume closes with a chronology, presenting a contextual guide to the main religious, political, cultural and artistic events of the period. This volume is an excellent tool for those undertaking research in this area.
