Front Matter -- Introduction / Roberta D'Alessandro and Diego
Pescarini -- The Distribution of Gender and Number in Lunigiana
Nominal Expressions / Edoardo Cavarani -- On the Interpretation of an
Interrogative Form in North-Eastern Italian Dialects / Patrizia Cordin --
Verb-Second and (Micro)Variation in Two Rhaeto-Romance Varieties of
Northern Italy / Jan Casalicchio and Federica Cognola -- On the
Palatalization of /s/ + Consonant in Some Dialects of Middle and
Southern Italy / Luca Lorenzetti -- On the Gender System of Viterbese /
Michele Loporcaro -- Indefinite Determiners: Variation and Optionality
in Italo-Romance / Anna Cardinaletti and Giuliana Giusti -- Italo-
Romance Phonological Rules and Indo-Aryan Lexicon: The Case of
Abruzzian Romani / Andrea Scala -- Avita fatta: Non-Etymological
Forms of Auxiliary *habere* in Southern Italian Dialects / Giancarlo
Schirru -- Adjectival Positions in Barese: Prenominal Exceptions to the
Postnominal Rule / Luigi Andriani -- Metaphony in Southern Salento:
New Analysis and New Data / Mirko Grimaldi and Andrea Calabrese --
The 'go for' Construction in Sicilian / Silvio Cruschina -- The
Complementizers *ca* and *chi* in Sardinian: Syntactic Properties and
Geographic Distribution / Caroline Bacciu and Guido Mensching --
Index.

Sommario/riassunto

This volume is a collection of grammar sketches from several Italo-Romance varieties. The contributions cover various areas of linguistics (phonology, morphology, syntax) and are organized in sections according to the customary geolinguistic classification. Each chapter provides the description of a salient phenomenon for a given language, based on novel data, as well as the state-of-the-art knowledge on that phenomenon. The articles are in-depth studies carried out by prominent experts as well as promising young scholars. The theoretical apparatus is kept to a minimum in order to make the book accessible to scholars without specific expertise. For the same reason, hypotheses and formalisms are introduced gradually, only if necessary for the description of the data.

3. Record Nr.	UNINA9910349465703321
Titolo	Advancement in the Pathophysiology of Cerebral Stroke // edited by Ranjana Patnaik, Amit Kumar Tripathi, Ashish Dwivedi
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2019
ISBN	981-13-1453-5 981-13-1452-7
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (VIII, 189 p. 23 illus., 12 illus. in color.)
Disciplina	612
Soggetti	Human physiology Neurosciences Cytology Stress (Physiology) Radiology Stem cells Nanotechnology Human Physiology Neuroscience Cellular Stress Stem Cell Biology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Cerebral stroke: An Introduction -- Chapter 2. Inflammation, oxidative stress, and neurodegeneration -- Chapter 3. Stroke induced blood brain barrier damage -- Chapter 4. Regulation of calcium ions in ischemic neuronal cell -- Chapter 5. Ischemic stroke induced endoplasmic reticulum stress -- Chapter 6. The role of autophagy in ischemic stroke: friend or foe?- Chapter 7. Critical role of mitochondrial autophagy in cerebral stroke -- Chapter 8. Application of neuroimaging in the identification of the pinpoint location of blockage -- Chapter 9. Emerging role of the electromagnetic field in stroke -- Chapter 10. Stemcell therapies for stroke -- Chapter 11. MicroRNA: Significance to stroke diagnosis, prognosis, and therapy -- Chapter

12. Therapeutic Aspects of Nanomedicines in Stroke Treatment -- Chapter 13. Neuroprotective potential of small molecule phytochemicals against stroke -- Chapter 14. Role of UV irradiation on neuroprotective potential of phytochemicals -- Chapter 15. Post-stroke treatment strategies, management, and rehabilitation.

Sommario/riassunto

This book provides detailed and comprehensive mechanistic insights of the various risk factors that lead to the ischemic stroke and the novel therapeutic interventions against it. The first section discusses the different ischemic cerebral stroke-induced inflammatory pathways and dysfunctionality of blood-brain barrier. The later sections of the book deals with the role of endoplasmic reticulum stress and mitophagy in cerebral stroke and introduces the different neuroimaging techniques such as Computed tomography (CT), Magnetic resonance imaging (MRI), Positron emission tomography (PET) and Single-Photon emission computed tomography (SPECT) that are used to identify the arterial blockages. The final section comprises of chapters that focus on various neuroprotective strategies and emerging therapeutic interventions for combating stroke pathophysiology. The chapters cover the role of stem cell therapy, the therapeutic effect of low-frequency electromagnetic radiations (LF-EMR), and implications of non-coding RNAs such as micro-RNAs as the biomarkers for diagnosis, prognosis, and therapy in ischemic stroke.
