Sommario/riassunto	Metal nanoparticles/polymers hybrid materials have significantly contributed to the develop of nanotechnology. Moreover, these hybrid materials can respond to stimuli (e.g., pH, temperature, light, magnetic field) or self-degrade in a controlled manner to release metal nanoparticles or therapeutics encapsulated. Functional and structural hybrid materials provide opportunities for creative fields, remarkable properties, and future advanced applications. This Special Issue focuses on highlighting the progress of new hybrid materials, based on metal nanoparticles and polymers, their design, preparation, functionalization, characterization, and advanced applications.

Sommario/riassunto	This book tackles the most significant issues facing Muslims today. Sachedina argues that we must reopen the doors of religious

interpretation--to correct false interpretations, replace outdated laws, and formulate new doctrines. His book critically analyzes Muslim teachings on such issues as pluralism, civil society, war and peace, and violence and self-sacrifice.
