HORMONAL CONTRACEPTIVES AND ANTIRETROVIRAL THERAPIES; ANNEX 2. LIST OF PARTICIPANTS

Sommario/riassunto

""Medical Eligibility Criteria for Contraceptive Use"" reviews the medical eligibility criteria for use of contraception, offering guidance on the safety and use of different methods for women and men with specific characteristics or known medical conditions. The recommendations are based on systematic reviews of available clinical and epidemiological research. It is a companion guideline to ""Selected Practice Recommendations for Contraceptive Use."" Together, these documents are intended to be used by policy-makers, program managers, and the scientific community to support national programs
