

1. Record Nr.	UNINA9910955487503321
Titolo	The complete dinosaur / / edited by M. K. Brett-Surman, Thomas R. Holtz Jr., and James O. Farlow ; Bob Walters, art director
Pubbl/distr/stampa	Bloomington, Ind., : Indiana University Press, 2012
ISBN	9786613683373 9781280772603 1280772603 9780253008497 0253008492
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (1160 p.)
Collana	Life of the past
Altri autori (Persone)	Brett-SurmanM. K. <1950-> FarlowJames Orville HoltzThomas R. <1965->
Disciplina	567.9
Soggetti	Dinosaurs Paleontology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Cover; Title; Copyright; Contents; Dinosauria; Contributors; Part 1 The Discovery of Dinosaurs; 1 Dinosaurs: The Earliest Discoveries; 2 Politics and Paleontology: Richard Owen and the Invention of Dinosaurs; 3 European Dinosaur Hunters of the Nineteenth and Twentieth Centuries; 4 North American Dinosaur Hunters; 5 The Search for Dinosaurs in Asia; 6 Dinosaur Hunters of the Southern Continents; Part 2 The Study of Dinosaurs; 7 Hunting for Dinosaur Bones; 8 The Osteology of the Dinosaurs; 9 Reconstructing the Musculature of Dinosaurs; 10 Dinosaur Paleoneurology 11 The Taxonomy and Systematics of the Dinosaurs 12 Dinosaurs and Geologic Time 13 Technology and the Study of Dinosaurs 14 Claws, Scales, Beaks, and Feathers: Molecular Traces in the Fossil Record 15 Dinosaurs as Museum Exhibits 16 Restoring Dinosaurs as Living Animals Part 3 The Clades of Dinosaurs 17 Evolution of the Archosaurs 18 Origin and Early Evolution of Dinosaurs 19 Theropods 20 Birds 21 Basal Sauropodomorpha: The "Prosauropods"; 22

Sauropoda; 23 Stegosaurs; 24 Ankylosaurs; 25 Marginocephalia; 26 Ornithopods; Part 4 Paleobiology of the Dinosaurs; Plates 27 Land Plants as a Source of Food and Environment in the Age of Dinosaurs 28 What Did Dinosaurs Eat: Coprolites and Other Direct Evidence of Dinosaur Diets; 29 Reproductive Biology of Dinosaurs; 30 Dinosaur Eggs; 31 How Dinosaurs Grew; 32 Engineering a Dinosaur; 33 Disease in Dinosaurs; 34 The Scientific Study of Dinosaur Footprints; 35 The Role of Heterochrony in Dinosaur Evolution; 36 Metabolic Physiology of Dinosaurs and Early Birds; 37 Evidence for Avian-Mammalian Aerobic Capacity and Thermoregulation in Mesozoic Dinosaurs; 38 ""Intermediate"" Dinosaurs: The Case Updated Part 5 Dinosaur Evolution in the Mesozoic 39 Principles of Paleobiogeography in the Mesozoic; 40 Non-Dinosaurian Vertebrates; 41 Early Mesozoic Continental Tetrapods and Faunal Changes; 42 Dinosaurian Faunas of the Later Mesozoic; 43 Dinosaur Extinction: Past and Present Perspectives; 44 Life after Death: Dinosaur Fossils in Human Hands; 45 Dinosaurs and Evolutionary Theory; Appendix: Dinosaur-Related Websites; Glossary; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S; T; U; V; W; X; Y; Z

Sommario/riassunto

Praise for the first edition: "A gift to serious dinosaur enthusiasts" - *Science* "The amount of information in [these] pages is amazing. This book should be on the shelves of dinosaur freaks as well as those who need to know more about the paleobiology of extinct animals. It will be an invaluable library reference." -*American Reference Books Annual* "An excellent encyclopedia that serves as a nice bridge between popular and scholarly dinosaur literature." -*Library Journal* (starred review)" Copiously illustrated and scrupulously up-to-date... the book reveals dinos through the fractious fields that make a study of them." - *Publishers Weekly* "Stimulating armchair company for cold winter evenings.... Best of all, the book treats dinosaurs as intellectual fun." - *New Scientist*" The book is useful both as a reference and as a browse-and-enjoy compendium." -*Natural History* What do we know about dinosaurs, and how do we know it? How did dinosaurs grow, move, eat, and reproduce? Were they warm-blooded or cold-blooded? How intelligent were they? How are the various groups of dinosaurs related to each other, and to other kinds of living and extinct vertebrates? What can the study of dinosaurs tell us about the process of evolution? And why did typical dinosaurs become extinct? All of these questions, and more, are addressed in the new, expanded, second edition of *The Complete Dinosaur*. Written by many of the world's leading experts on the "fearfully great" reptiles, the book's 45 chapters cover what we have learned about dinosaurs, from the earliest discoveries of dinosaurs to the most recent controversies. Where scientific contention exists, the editors have let the experts agree to disagree. Copiously illustrated and accessible to all readers from the enthusiastic amateur to the most learned professional paleontologist, *The Complete Dinosaur* is a feast for serious dinosaur lovers everywhere.
