| Sommario/riassunto      | This study examines the system of classificatory particles - the divisions of the noun lexicon into distinct classes - in Kilivila, the Austronesian language of the Trobrian Islanders of Papua New Guinea. The author uses data gathered in field research.                                                                                                                                                                                                                                                                                                                                                                                                                           |
