

1. Record Nr.	UNINA9910955716203321
Autore	Arce Pedro F
Titolo	Fluid phase behavior of systems involving high molecular weight compounds and supercritical fluids // Pedro F. Arce and Martin Aznar
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2010
ISBN	1-61324-617-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (139 p.)
Collana	Chemical engineering methods and technology
Altri autori (Persone)	AznarMartin
Disciplina	541/.363
Soggetti	Phase rule and equilibrium Supercritical fluids Molecular weights High pressure (Technology) Fluid dynamics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [113]-121) and index.
Nota di contenuto	Intro -- FLUID PHASE BEHAVIOR OF SYSTEMS INVOLVING HIGH MOLECULAR WEIGHT COMPOUNDS AND SUPERCRITICAL FLUIDS -- FLUID PHASE BEHAVIOR OF SYSTEMS INVOLVING HIGH MOLECULAR WEIGHT COMPOUNDS AND SUPERCRITICAL FLUIDS -- CONTENTS -- PREFACE -- Chapter 1 ABSTRACT -- Chapter 2 INTRODUCTION -- Chapter 3 THERMODYNAMIC MODELS -- 3.1. Sommario/riassunto

Although supercritical fluids (SCF) and their unique solvent characteristics have been a matter of continuing scientific interest since the past century, their potential benefit to chemical processing have not been fully realised; it is only in the past a few years that SCF solvents have been the focus of active research and development programs.
