Sommario/riassunto

As each period in the history of the language sciences has chosen to focus on different key questions, the study of that history promises to open our eyes to the variety of interesting questions that can be asked, and answered - taking off the blinders of contemporary preoccupations. September 1-5, 2005, linguists from twenty-five countries gathered at the University of Illinois at Urbana-Champaign to share their passion for the history of their discipline. This volume is a distillation of many fine contributions from that conference, shedding light on the many different approaches to the study of language.
