

1.	Record Nr.	UNIORUON00016478
	Titolo	Giappone-Italia oggi: due mondi a confronto
	Pubbl/distr/stampa	Roma, : Ambasciata del Giappone, 1985
	Descrizione fisica	126 p. ; 18 cm
	Classificazione	GIA XII
	Soggetti	GIAPPONE - GUIDE
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910955873203321
	Titolo	Conservation biology and applied zooarchaeology // edited by Steve Wolverton and R. Lee Lyman
	Pubbl/distr/stampa	Tucson, : University of Arizona Press, c2012
	ISBN	1-299-19188-6 0-8165-9929-7
	Edizione	[1st ed.]
	Descrizione fisica	1 online resource (252 p.)
	Altri autori (Persone)	WolvertonSteve LymanR. Lee
	Disciplina	930.1/0285
	Soggetti	Conservation biology Archaeology Animal remains (Archaeology) Animal ecology
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Intro -- Contents -- Preface -- 1. Introduction to Applied Zooarchaeology - Steve Wolverton and R. Lee Lyman -- 2. Zooarchaeological Evidence for Sandhill Crane (<i>Grus canadensis</i>)

Breeding in Northwestern Washington State - Kristine M. Bovy -- 3. Archaeological Freshwater Mussel Remains and Their Use in the Conservation of an Imperiled Fauna - Evan Peacock -- 4. Prehistoric Biogeography and Conservation Status of Threatened Freshwater Mussels (Mollusca: Unionidae) in the Upper Trinity River Drainage, Texas - Charles R. Randklev and Benjamin J. Lundeen -- 5. Ancient Actions Predict Modern Consequences Prehistoric Lessons in Marine Shellfish Exploitation - Heather B. Thakar -- 6. The Overkill Hypothesis and Conservation Biology - Lisa Nagaoka -- 7. Paleozoological Stable Isotope Data for Modern Management of Historically Extirpated Missouri Black Bears (*Ursus americanus*) - Corinne N. Rosania -- 8. Rockfish in the Long View Applied Zooarchaeology and Conservation of Pacific Red Snapper (Genus *Sebastes*) in Southern California - Todd J. Braje, Torben C. Rick, and Jon M. Erlandson -- 9. The Past, Present, and Future of Small Terrestrial Mammals in Human Diets - Karen Gust Schollmeyer and Jonathan C. Driver -- 10. Applied Zooarchaeology History, Value, and Use - R. Lee Lyman -- About the Contributors -- Index.

Sommario/riassunto

Until now, the research of applied zooarchaeologists has not had a significant impact on the work of conservation scientists. This book is designed to show how zooarchaeology can productively inform conservation science. "Conservation Biology and Applied Zooarchaeology" offers a set of case studies that use animal remains from archaeological and paleontological sites to provide information that has direct implications for wildlife management and conservation biology. It introduces conservation biologists to zooarchaeology, a sub-field of archaeology and ethnobiology, and provides a brief historical account of the development of applied zooarchaeology. The case studies, which utilize palaeozoological data, cover a variety of animals and environments, including the marine ecology of shellfish and fish, potential restoration sites for Sandhill Cranes, freshwater mussel biogeography and stream ecology, conservation of terrestrial mammals such as American black bears, and even a consideration of the validity of the Pleistocene "rewilding" movement. The volume closes with an important new essay on the history, value, and application of applied zooarchaeology by R. Lee Lyman, which updates his classic 1996 paper that encouraged zooarchaeologists to apply their findings to present-day environmental challenges. Each case study provides detailed analysis using the approaches of zooarchaeology and concludes with precise implications for conservation biology. Essays also address issues of political and social ecology, which have frequently been missing from the discussions of conservation scientists. As the editors note, all conservation actions occur in economic, social, and political contexts. Until now, however, the management implications of zooarchaeological research have rarely been spelled out so clearly.
