Sommario/riassunto	This volume contains ten papers describing various reading and translation experiments using eye-tracking techniques (sometimes combined with other process tools such as keystroke and pause logging methodology). Copenhagen Studies in Language volumes 36 and 37 (Behind the Mind edited by Susanne Gopferich, Arnt Lykke Jakobsen and Inger M. Mees) are two complementary volumes containing empirical studies by scholars working in the field of translation process research. Contributors include members of the EU Eye-to-IT project and the Graz longitudinal study as well as researchers from both Copenhagen Business School and a number of other universities worldwide.
