| Sommario/riassunto      | Skip Worden shows the profound transformation of Christian thought on economics from the beginning of the Commercial Revolution to the fifteenth-century Renaissance. Worden explains how the general antagonism toward the pursuit of wealth before the Commercial Revolution turned into Protestant theologians' fighting against the prevailing view of a pro-wealth paradigm during the fifteenth century. |

| Sommario/riassunto      | "The Prehistory of the Crusades explores how the Crusades came to be seen as the use of aggressive warfare to Christianise pagan lands and peoples. Reynolds focuses on the Baltic, or Northern, Crusades, an aspect of the Crusades that has been little documented, thus bringing a new perspective to their historical and ideological origins" --                                                                                                                                           |
