

1. Record Nr.	UNINA9910956251503321
Titolo	The Texas that might have been : Sam Houston's foes write to Albert Sidney Johnston // collected by Margaret Swett Henson ; edited and with an introduction by Donald E. Willett
Pubbl/distr/stampa	College Station, : Texas A&M University Press, c2009
ISBN	1-299-05391-2 1-60344-371-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (313 p.)
Collana	Elma Dill Russell Spencer series in the South and Southwest ; ; no. 33
Altri autori (Persone)	JohnstonAlbert Sidney <1803-1862.> HensonMargaret Swett <1924-2001.> WillettDonald
Disciplina	976.4/04
Soggetti	Texas Officials and employees Correspondence Texas History Republic, 1836-1846 Texas History 1846-1950
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	"The glorious excitement of uncertainty": the Lamar years, 1838-1841 -- "All that emanates from him is falsehood upon deceit": the Houston years, 1842-1845 -- "So let it be": statehood and secession, 1846-1861 -- Appendix: chronological list of the letters -- Notes to preface and introductions.
Sommario/riassunto	Although Sam Houston would eventually emerge as the dominant shaper of the developing Texas Republic's destiny, many visions competed for preeminence. One of Houston's sharpest critics, Gen. Albert Sidney Johnston, is the subject of this fascinating edition of letters from the period. Donald E. Willett offers new annotation and analysis to these letters from Johnston's colleagues, friends, and supporters--first collected and edited by contrarian scholar Margaret Swett Henson, but never before published.

Nota di contenuto	Book Cover; Title; Copyright; Contents; List of tables; List of figures; Preface; Acknowledgments; List of abbreviations; 1 Introduction; 2 The transformation of the Chinese research system; 3 The evolution of the molecular life sciences in China; 4 Support for international research collaboration; 5 The outbound tide: Students and scientists leaving China; 6 Trends in international collaboration; 7 The returning tide: Returned scientists; 8 The role of returnees in the changing of the Chinese research culture; 9 Conclusions; Annexes; Glossary; Bibliography; Index
Sommario/riassunto	China's rise is having a large impact on the global science system. The internalisation of this system in the past two decades would not have been possible without the outbound and especially the return flows of overseas Chinese scientists. This book explores their impact combining macro-level institutional and statistical analysis with an account of how

the research culture has changed at the operational level. The theoretical framework used departs from the human capital approach, by building on literature from migration studies and evolutionary theories of the science system. It presents
