output model; Part V Productivity; 14 A neoclassical analysis of TFP using input-output prices; 15 Neoclassical growth accounting and frontier analysis: a synthesis

Part VI Services and trade16 A general equilibrium analysis of the evolution of Canadian service productivity; 17 Productivity trends and employment across industries in Canada; 18 The location of comparative advantages on the basis of fundamentals only; Index

Sommario/riassunto

This book aims to make the nature of input-output analysis in economics clearly accessible and, contrary to the opinion of many commentators, shows that this type of analysis can be compatible with the doctrines of neoclassical economics.
