| Sommario/riassunto | The Wounded Knee Massacre of December 29, 1890, known to U.S. military historians as the last battle in "the Indian Wars," was in reality another tragic event in a larger pattern of conquest, destruction, killing, and broken promises that continue to this day. On a cold winter's morning more than a century ago, the U.S. Seventh Cavalry attacked and killed more than 260 Lakota men, women, and children at Wounded Knee Creek in South Dakota. |
