

1. Record Nr.	UNINA9910956395903321
Autore	Michelini Rinaldo C
Titolo	Duty-split approach in robotic surgery / / Rinaldo C. Michelini, Silvia Frumento and Roberto P. Razzoli
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, 2010
ISBN	1-61668-457-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (69 p.)
Collana	Robotics research and technology
Altri autori (Persone)	FrumentoSilvia RazzoliRoberto P
Disciplina	617/.9178
Soggetti	Surgical robots
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Computer-assisted surgery -- The split-duty approach -- Augmented reality action.
Sommario/riassunto	Mini-invasive surgery deserves increasing attention to lower post-operative stays in hospitals and to lessen fall-off complications. This new book is devoted to surgical robotics, with a focus on technology and design issues of the remote-mode operation assistants. The investigation leads to define the technical characteristics of a CRHA, co-robotic handling appliance, to be purposely developed, to support the duty-split approach surgical planner.
