

1. Record Nr.	UNINA9910956504203321
Autore	Watts Frank B
Titolo	Configuration management metrics : product lifecycle and engineering documentation control measurements // Frank B. Watts
Pubbl/distr/stampa	Oxford ; ; Burlington, MA, : Elsevier/William Andrew, 2009
ISBN	1-282-38197-0 9786612381973 1-4377-7834-8
Descrizione fisica	1 online resource (279 p.)
Classificazione	BUS041000BUS087000
Disciplina	658.5 670.285
Soggetti	Configuration management Production management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Front Cover; Configuration ManagementMetrics; Copyright; Contents; Acknowledgements; Preface; List of Figures; List of Tables; Chapter 1Introduction; What is CM?; Setting the stage for innovation; Bridge the gap; CM Processes; Why is measurement important?; Importance/urgency of metrics; CM process ladder; Process quality; Chapter 2Metrics and process requirements; Timeliness of reporting; The first step to improvement; Not enough data/too much data; Metric formats; Thru-put time; Frequency of reporting; Policy and procedure requirements; Work in process (WIP) and thru-put time Getting management's attentionManagement champion; Training metrics; Setting goals; Tooting your horn; Facts database; Benchmarking; Benchmarking survey - general; Chapter 3New item release; Release standards, definitions and rules; New product time to market; Release process flow diagram; Release activity data; Release activity summary; Release - sorting out what's important; Development process case study; Release in lead time; Release time benchmarks; Support and manufacturing process documents; Other engineering release metrics; Release process quality; Release phase status Benchmarking survey - release processChapter 4Order entry and

fulfillment; Order entry process; Order fulfillment; Promise to deliver; Make to order; Design to order; Make to print; Make to stock; Order entry and fulfillment process quality; Chapter 5 Bill of material (BOM) process; BOM process standards; Part number assignment; Item master file; Multiple BOMs; BOM reconciliation and correction; New product BOM status; BOM levels; Benchmarking survey - BOM process; Chapter 6 Request process; Request process standards; Request flow diagram; Request action items list; Request process time metrics
Request rejection is OK Benchmarking survey - request process; Chapter 7 Ancillary processes; Deviations; Deviation standards; Deviation to make a fast change; Service parts; Publications; Failure reporting; Chapter 8 Change cost; Benchmarking survey - change cost; Cost standards; Average cost of a change; Payback; Market demand; Cost metric and application; Real cost reductions; Other possible cost metrics; Bottom line; Chapter 9 Change process; Change standards; Interchangeability; Change class; Change control process flow; Engineering phase; Technical release/point of no return
Configuration Management phase Manufacturing phase; Change process summary; Case study; Engineering phase metrics; Point of no return metrics; CM phase metrics; Manufacturing phase metrics; Total change process time; Change process quality; Benchmarking survey - change process; Chapter 10 Field change metrics; Field change standards; Field change process flow; Field change order metrics; Field installation performance; Field change volume; Benchmarking survey - field changes; Chapter 11 Definitions; Data dictionary; Acronyms and terms; Summary; Index

Sommario/riassunto

Configuration Management (CM) has become a key strategy for successful manufacturing companies. Controlling the design documentation throughout its lifecycle and knowing what is in the product is imperative for quickly moving a new product to the marketplace, identifying and making necessary changes as fast as possible. CM is similarly important to efficient, high quality and low cost supply chain and production processes. It is also critical to maintenance, repair, retrofit, service parts provisioning as well as the elephant in the room - liability protection. Fast, accurate, efficient, do
