| Sommario/riassunto      | This is the first extensive study in English or Chinese of China's reception of the celebrated physicist and his theory of relativity. In a series of biographical studies of Chinese physicists, Hu describes the Chinese assimilation of relativity and explains how Chinese physicists offered arguments and theories of their own. Hu's account concludes with the troubling story of the fate of foreign ideas such as Einstein's in the Chinese Cultural Revolution (1966-1976), when the theory of relativity was denigrated along with Einstein's ideas on democracy and world peace. |

| Sommario/riassunto      | What difference does culture make?Coping with Alcohol and Drug Problems: The Experiences of Family Members in Three Contrasting Cultures aims to deepen and extend understanding of the experiences of family members trying to cope with the excessive drinking or drug taking of a relative. Comprehensive and thoroughly up to date, this book draws on the results of the cross-cultural study of alcohol and drug problems in the family, and places these results within the   |

broader context of the international literature on the subject. By  
investigating the simil
