**Sommario/riassunto**

Why does 'value innovation' play an important role for small and medium-sized enterprises (SMEs)? Innovation, besides imitation, is the foundation to conduct business and produce goods and services. Each company needs at least at one point or another during its lifecycle innovation to stay competitive within a market. Its importance increases throughout time because of new companies accessing existing domestic markets by overcoming the market barriers and the international integration of markets for global trading. Aside the well-known forms of innovation, a new type called 'value innovation'

## Sommario/riassunto

Textiles and Clothing are key sectors and apparel is one of the necessities of human life. Environmental brunt of the textile sector and cradle to grave life cycle impacts of textiles and clothing products are a subject of constant investigation. There have been a lot of advancements in the textile sector in terms of materials such as textile fibres, yarns, fabrics, garments and also in terms of processes. All these innovations demand an environmental profile as well. Life Cycle Assessment is one of the widely used and popular scientific tools which has been utilized to measure the environmental footprints of various products and processes. This volume presents recent advances on LCA in the textiles and clothing sector.
