Sommario/riassunto	In 2002, the Tourette Syndrome Association formed the TS Behavioral Sciences Consortium (BSC). The charge of the BSC was to develop and test nonpharmacological treatment options for individuals, both children and adults with Tourette Syndrome. This manual is the result of their work, and represents the most scientifically effective behavioral treatment for Tourette Syndrome available today. The treatment program uses Habit Reversal Training (HRT) for children and adults with chronic tic disorder. Individual treatment is based at its core on awareness training, the development of a specific com
