1.	Record Nr.	UNINA9910956745103321
	Autore	Winsor Dorothy A
	Titolo	Writing power : communication in an engineering center / / Dorothy A. Winsor
	Pubbl/distr/stampa	Albany, : State University of New York Press, c2003
	ISBN	9780791486702 0791486702
	Edizione	[1st ed.]
	Descrizione fisica	1 online resource (184 p.)
	Collana	SUNY series, Studies in scientific and technical communication
	Disciplina	620/.001/4
	Soggetti	Communication in engineering Technical writing
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references (p. 163-170) and index.
	Nota di contenuto	""Writing Power""; ""Contents""; ""Illustrations""; ""Acknowledgments""; ""Vignette 1. Scenes in an Engineering Center(and Elsewhere)""; ""1. 	Sommario/riassunto	Winner of the 2004 Distinguished Publication on Business Communication presented by the Association of Business CommunicationWriting Power examines the way that texts, knowledge, and hierarchy generate and support one another within a for-profit corporation. By encouraging us to see texts and writing as powerful operators in the corporate world, this book presents a case study focused on how one engineering organization uses texts to create and maintain its knowledge and power structure. Based on over five years of observations, the book describes the co-generation of

power/knowledge/text from several points of view, including that of managers, engineers, interns, and blue-collar workers. These groups of people use texts to build knowledge within their own areas and establish control over their work when it is passed along to the other groups. Employing Bourdieu's notion that people possess different kinds of "capital" that can be converted to one another under the right circumstances, the book demonstrates that text is one of the major ways that this conversion of capital takes place, and is thus one of the major ways that power and knowledge are generated and accumulated.

	Sommario/riassunto	The professional fields of Wireless Computer Networks and Personal, Indoor and Mobile Radio Communications have, within a few years, become the fastest growing business area of telecommunications. The papers presented in these volumes on WCN focus on the emerging wireless extensions of intelligent networking and other computer services. The contributions on PIMRC concentrate on the latest developments in radio technologies and network access.
