Sommario/riassunto	This book sets out a method for identifying the opponents in view in Paul's letters, and then applies it to the relevant writings of the Pauline corpus. The method limits the use of parallels or prior constructions as a basis for identification, dealing with each letter on an individual basis and taking full account of the historical and social context. Sumney concludes that the Pauline letters address different kinds of opposition in different places, including two distinct anti-Paul movements. Here is

a fundamental study for research into a basic problem of the Pauline correspondence.

Nota di contenuto	Charting a course for Black women's studies in political science -- From margin to center : African American women and Black feminist theory -- Race trumps gender or vice versa? : cross pressures, and deliberate choices -- Black feminist consciousness and its determinants : factors rooted in experience -- Black feminist consciousness, race consciousness, and Black political behavior -- The future of feminist scholarship and Black politics research.
Sommario/riassunto	In Black Feminist Voices in Politics, Evelyn M. Simien charts a course for black women's studies in political science. Examining the simultaneous effects of race and gender on political behavior, Simien uses a national telephone survey sample of the adult African American population to discover the extent to which black women and men support black feminist tenets. At the heart of this book are answers to such questions as: How does the absence of black feminist voices impair our understanding of group consciousness? What factors make individuals

more or less likely to adopt black feminist views? Are men just as likely as women to support black feminist tenets? Simien analyzes the survey data, responds to limitations of existing research, and addresses critical questions that many black academics, intellectuals, and activists have devoted significant energy to debating without much empirical evidence.
