

1. Record Nr.	UNINA9910511669103321
Autore	Wirth Axel
Titolo	Medical device cybersecurity for engineers and manufacturers / / Axel Wirth, Christopher Gates, Jason Smith
Pubbl/distr/stampa	Norwood, Massachusetts : , : Artech House, , 2020 [Piscataqay, New Jersey] : , : IEEE Xplore, , 2020 ©2020
ISBN	1-63081-816-X
Descrizione fisica	1 online resource (303 pages)
Collana	Artech House Information Security and Privacy Series
Disciplina	338.476817610973
Soggetti	Medical instruments and apparatus industry Medical instruments and apparatus - Safety regulations Computer security Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages 260-261) and index.
Nota di contenuto	1. Why secure medical devices? -- 2. Establishing a cybersecurity focus -- 3. Supply chain management -- 4. Medical device manufacturers' development cycle -- 5. Security in production and sales -- 6. Medical device manufacturer postmarket lifecycle -- 7. HDO lifecycle -- 8. Documentation and artifacts -- 9. Organizational development of roles and responsibilities -- 10. Security technology, tools, and practices -- 11. Select topics/deep dives -- Glossary -- References -- About the authors -- Contributors -- Index.
Sommario/riassunto	" Cybersecurity for medical devices is no longer optional. We must not allow sensationalism or headlines to drive the discussionŒ Nevertheless, we must proceed with urgency. In the end, this is about preventing patient harm and preserving patient trust. A comprehensive guide to medical device secure lifecycle management, this is a book for engineers, managers, and regulatory specialists. Readers gain insight into the security aspects of every phase of the product lifecycle, including concept, design, implementation, supply chain, manufacturing, postmarket surveillance, maintenance, updates, and end of life. Learn how to mitigate or completely avoid common

cybersecurity vulnerabilities introduced during development and production. Grow your awareness of cybersecurity development topics ranging from high-level concepts to practical solutions and tools. Get insight into emerging regulatory and customer expectations. Uncover how to minimize schedule impacts and accelerate time-to-market while still accomplishing the main goal: reducing patient and business exposure to cybersecurity risks. Medical Device Cybersecurity for Engineers and Manufacturers is designed to help all stakeholders lead the charge to a better medical device security posture and improve the resilience of our medical device ecosystem. "--

2. Record Nr.	UNINA9910957198203321
Autore	Nallari Raj <1955->
Titolo	Gender and macroeconomic policy / / Raj Nallari and Breda Griffith
Pubbl/distr/stampa	Washington, D.C. : , : World Bank, , c2011

### Sommario/riassunto

Mainstream economic analysis has traditionally overlooked gender. The individual—the basic category of analysis—was regarded as genderless. Neither gender discrimination nor segmentation and segregation within the labor market or within the household was present. Contributions from development theory, new household economics (NHE), labor economics, and feminist analysis have done much to change this. Focusing on gender equality—by which we mean equality in opportunity, inputs, and outcome—has yielded important insights for the growth and development of an economy. But we are still at the cusp.
