This book shifts the focus of Pidgin and Creole Studies from the better-known Atlantic/Caribbean contexts to the Indian Ocean, the South China Sea and Mongolia. By looking at Asian contexts before and after Western colonial expansion, we offer readers insights into language contact in historical settings and with empirical features substantially different from those that have shaped the theory of the field. Two pidgin varieties of the Far East are described in detail, namely Chinese-Pidgin Russian and China Coast Pidgin. The former offers a unique opportunity to observe the typological dynamic
