

1. Record Nr.	UNINA9910957319703321
Titolo	Survey measurement of work disability : summary of a workshop / / Nancy Mathiowetz and Gooloo S. Wunderlich, editors
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 2000
ISBN	0-309-17216-0 0-309-51663-3
Edizione	[1st ed.]
Descrizione fisica	x, 97 p. : ill
Altri autori (Persone)	MathiowetzNancy A WunderlichGooloo S
Disciplina	616.075
Soggetti	Disability evaluation - United States Social security - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 73-76).
Nota di contenuto	Front Matter -- Acknowledgments -- Contents -- 1 Introduction -- 2 Conceptual Issues in the Measurement of Work Disability -- 3 Methodological Issues in the Measurement of Work Disability -- 4 Summary of Workshop Discussions -- 5 An Agenda for Research in Survey Measurement of Work Disability -- References -- APPENDIX B Workshop on Survey Measurement of Work Disability: Challenges for Survey Design and Method -- APPENDIX C Workshop on Survey Measurement of Work Disability: Challenges for Survey Design and Method -- Acronyms and Abbreviations -- Biographical Sketches of Committee Members.
Sommario/riassunto	The Social Security Administration (SSA) is engaged in redesigning its disability determination process for providing cash benefits and medical assistance to blind and disabled persons under the Social Security Disability Insurance (SSDI) program and the Supplemental Security Income (SSI) program (Title II and Title XVI of the Social Security Act). The agency has undertaken a multiyear research effort to develop and test the feasibility, validity, reliability, and practicality of the redesigned disability determination process before making any decision about its national implementation. Survey Measurement of Work Disability reviews and provides advice on this research. One of

the major areas for review is the ongoing independent, scientific review of the scope of work, design, and content of the Disability Evaluation Study (DES) and the conduct of the study by the chosen survey contractor. This report identifies statistical design, methodological, and content concerns and addresses other issues as they arise.
