Managed Care Systems and Emerging Infections: Challenges and Opportunities for Strengthening Surveillance, Research, and Prevention
Jonathan R. Davis, Editor; Based on a Workshop of the Forum on Emerging Infections, Institute of Medicine This workshop summary report from the IOM Forum on Emerging Infections, Managed Care Systems and Emerging Infections: Challenges and Opportunities for

Strengthening Surveillance, Research and Prevention This book examines how the managed care revolution has created both problems and opportunities in the fight against infectious diseases. It highlights ways in which managed care systems can aid research, develop clinical guidelines, manage the use of antibiotics, support public education efforts, and monitor the spread of emerging infections and microbial resistance.
