Sommario/riassunto

As the world's second largest economy, China has made great progress in developing criminology. The Routledge Handbook of Chinese Criminology aims to be a key reference point to summarize the large body of literature in both Chinese and English about various aspects of crime and its control in China for international scholars with an interest in the development of criminological research on and in the Greater China region, and for everyone with a broad interest in international criminology. The editors of the handbook have selected authoritative contributors recognized for their research and s

Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. The reading toolkit -- pt. 2. Paper structure and purpose.
Sommario/riassunto	The book helps scientists write papers for scientific journals. Using the key parts of typical scientific papers (Title, Abstract, Introduction, Visuals, Structure, and Conclusions), it shows through numerous examples, how to achieve the essential qualities required in scientific writing, namely being clear, concise, convincing, fluid, interesting, and organized. To enable the writer to assess whether these parts are well written from a reader's perspective, the book also offers practical metrics in the form of six checklists, and even an original Java application to assist in the evaluation.
