Sommario/riassunto	This book discusses how all emotional pains suffered by the individual remain a part their unconscious for the rest of their life. All negative emotions, emotional suffering that the individual refuses to face, leave a mark in their unconscious. It is particularly difficult to be faced with, as well as to treat, powerful negative emotions in childhood. Such unprocessed emotional pains constitute the foundations of Pain Body. Apprehension, hatred, self-pity, remorse, rage, depression, envy, etc. are all manifestations of the Pain Body. This book develops measuring instruments that may serve as an aid in the recognition of the manifestation of the Pain Body, and also shows the degree of control over the Pain Body.
