The roles of sensation, interoception, and sensorimotor action imagery -- 2. Motivated attention in action -- 1. Linear versus dynamical causal sequences in the brain -- 2. Conflicting theories with conflicting empirical predictions -- 3. The P300 ERP as an

operational definition of perceptual consciousness -- 4. How the Mack and Rock data relate to the two types of hypotheses -- 5. The paradox of early and late selection -- 6. Attention and conscious processing -- 7. Further implications for the problems of attention and consciousness -- 3. Non-consummatory motivations -- 1. Intertheoretic reduction

and consummatory-drive reductionism -- 2. The notion of "extropy": A non-reductive force? -- 3. The humanistic notion of "life wish" -- 4. A possible synthesis -- 4. Homeostasis, extropy, and boundary needs as grounding specific emotions -- 1. Physiological evidence for nonconsummatory motivation -- 2. Novelty, constraints to freedom, and the action-consciousness connection -- 3. The importance of extropy needs in higher mammals -- 4. Existential requirements for an adequate dynamical theory of emotion -- 5. Toward an integrated physiological and phenomenological account -- 5. Varieties of extended self and personality -- 1. How emotion grounds the various senses of self -- 2. Why not an illusory-choice model?. 3. The embodied self and the personality -- 4. How can there be knowledge of the self? -- 6. Learning about emotions through the arts -- 1. An enactive dance form for the eye -- 2. Why does art move, and not just entertain? -- 3. Love and other non-consummatory motivations -- 7. Dynamical systems and emotional agency -- 1. The causal power of dynamical systems -- 2. How can top-down systems avoid violating causal closure? -- 3. The emotional brain as an enactive system -- 4. Objections and responses -- Conclusion -- References --Index -- The series Advances in Consciousness Research.

## Sommario/riassunto

Emotion drives all cognitive processes, largely determining their qualitative feel, their structure, and in part even their content. Actioninitiating centers deep in the emotional brain ground our understanding of the world by enabling us to imagine how we could act relative to it, based on endogenous motivations to engage certain levels of energy and complexity. Thus understanding personality, cognition, consciousness and action requires examining the workings of dynamical systems applied to emotional processes in living organisms. If an object's meaning depends on its action affordances, then understanding intentionality in emotion or cognition requires exploring why emotion is the bridge between action and representational processes such as thought or imagery; and this requires integrating phenomenology with neurophysiology. The resulting viewpoint, "enactivism," entails specific new predictions, and suggests that emotions are about the self-initiated actions of dynamical systems, not reactive "responses" to external events; consciousness is more about motivated anticipation than reaction to inputs. (Series A).

Nota di contenuto Introduction: the problem with names -- The place of Rus' in medieval Europe -- The historiography of the translation of kniaz' -- Titulature and medieval rulers -- What was a kniaz'? -- Medieval titulature and Rus' -- Titles for other medieval rulers in Russian sources --Conclusion: consequences and resolutions. As scholarship continues to expand the idea of medieval Europe Sommario/riassunto beyond 'the West,' the Rus' remain the final frontier relegated to the European periphery. The Kingdom of Rus' challenges the perception of Rus' as an eastern 'other' - advancing the idea of the Rus' as a kingdom deeply integrated with medieval Europe, through an innovative analysis of medieval titles. Examining a wide range of medieval sources, this book exposes the common practice in scholarship of referring to Russian rulers as princes as a relic of early modern attempts to diminish the Rus'. Not only was Rus' part and parcel of medieval Europe, but in the eleventh and twelfth centuries Rus' was the largest

kingdom in Christendom.
