| Sommario/riassunto | "To date, little has been published about the place of spirituality in working with survivors of intimate partner violence. Overcoming Conflicting Loyalties examines the intersection of faith and culture in the lives of religious and ethno-cultural women in the context of the work of FaithLink, a unique community initiative that encourages religious leaders and secular service providers to work together. The authors present the benefits of such co-operation by reporting the findings of three qualitative research studies. Individuals in secular and |

sacral services who work with victims of domestic violence, as well as academics in the fields of social work, psychology, and religious studies, will benefit from the insights, depth of experience, and range of voices represented in this valuable book."--

Sommario/riassunto

This book brings together in one volume what researchers have learned about workers, employers, and retirees that is important for formulating retirement income policies. As the U.S. population ages, there is increasing uncertainty about the solvency of the Social Security and Medicare systems and the adequacy of private pensions to provide for people's retirement needs. The volume covers such critical behaviors as workers' decisions to retire, people's choices of saving over consumption, and employers' decisions about hiring older workers and providing pension and health care benefits. Also covered are trends in mortality, health status, and health care costs that are key to

projecting the likely costs and effects of alternative retirement income security policies and a strategy for combining data and research knowledge into a policy modeling framework.
