Sommario/riassunto	In my 2-Minute Neuroscience videos I explain neuroscience topics in 2 minutes or less. In this video, I discuss the cerebellum. I describe the location of the cerebellum in the nervous system and its role in facilitating movement. I cover the different regions of the cerebellum: the cerebrocerebellum, spinocerebellum, vermis, and vestibulocerebellum. Lastly, I discuss the cerebellar peduncles as the routes by which the cerebellum communicates with the rest of the nervous system and the deep cerebellar nuclei as the primary output cells of the cerebellum.

Sommario/riassunto	<p><P>Designing for User Engagement on the Web: 10 Basic Principles is concerned with making user experience engaging. The cascade of social web applications we are now familiar with - blogs, consumer reviews, wikis, and social networking - are all engaging experiences. But engagement is an increasingly common goal in business and productivity environments as well. This book provides a foundation for all those seeking to design engaging user experiences rich in communication and interaction. </P><P>Combining a handbook on basic principles with case studies, it provides readers with a ric</p>
