

1. Record Nr.	UNINA9910958147203321
Autore	Hackett Mark
Titolo	The Aqua Group Guide to Procurement, Tendering and Contract Administration
Pubbl/distr/stampa	New York : , : John Wiley & Sons, Incorporated, , 2016 ©2015
ISBN	9781118346624 9781118346549
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (387 pages)
Altri autori (Persone)	StathamGary
Disciplina	692
Soggetti	TECHNOLOGY & ENGINEERING / Construction / General
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	<p>Intro -- Title Page -- Copyright -- Contents -- Part I Briefing the Project Team -- Chapter 1 The Project Team -- Introduction -- Parties to a building contract and their supporting teams -- Rights, duties and responsibilities -- The employer -- The architect/contract administrator -- The quantity surveyor -- The principal designer -- The clerk of works -- The status of named consultants -- Unnamed consultants with delegated powers -- The project manager -- The principal contractor -- Sub-contractors -- Statutory requirements -- The CDM regulations -- Avoiding disputes -- Communications -- Chapter 2 Assessing the Needs -- The structure -- The strategic definition -- Contribution to the initial project brief -- The initial programme -- The appointment -- Appointment documents -- Collateral warranties -- Chapter 3 Buildings as Assets -- Buildings as assets as well as buildings -- Single building or programme? -- Buildings as solutions to business challenges? -- Everyday solutions-based thinking -- Summary -- Part II Available Procurement Methods -- Chapter 4 Principles of Procurement -- Simple theory-complex practice -- The eternal triangle -- Other considerations -- The Construction (Design and Management) Regulations 2015 -- Risk -- Accountability -- Entering into the contract -- Type of contract -- Selection of the contractor-the tendering procedure -- Establishing price and time -- The dynamics of tendering -- Chapter 5 Basic</p>

Concepts -- Economic use of resources -- Labour -- Materials -- Plant -- Capital -- Contractor's contribution to design and contract programme -- Production cost savings -- Continuity -- Risk and accountability -- Accountability -- Summary -- Chapter 6

Accountability -- Background -- The modern concept of public accountability -- Contract documentation -- Proper price -- Dispensing with competition -- Inflation.

Value for money -- Summary -- Chapter 7 Value and Risk Management -- Value management -- Value articulation and project definition -- Optimisation of benefits and costs -- Learning lessons and performance optimisation -- Risk management -- Risk must be managed -- Nothing ventured, nothing gained -- Understanding the project -- Risk management strategies -- Allocating management actions -- Value and risk are complementary -- Similarities in the processes -- The integrated process -- Chapter 8 Fixed Price and Cost Reimbursement -- Fixed price -- Cost reimbursement -- Application to contract elements -- Fluctuations -- Target cost contracts -- Use -- The employer's position -- The contractor's position -- Programme -- Summary -- Chapter 9 Fixed Price Contracts -- JCT fixed price contracts -- The standard building contract -- Design and build contract -- Major project construction contract -- Intermediate building contract -- Minor works building contract -- Other fixed price contracts available -- Advantages and disadvantages of fixed price contracts -- Advantages -- Disadvantages -- Chapter 10 Cost Reimbursement Contracts -- The fee -- The prime cost building contract -- Characteristics of the form -- Advantages and disadvantages of cost reimbursement contracts -- Advantages -- Disadvantages -- Budget and cost control -- Administering the contract -- Procedure for keeping prime costs -- Contractor's site staff and direct workforce -- Materials -- Plant -- Credits -- Sub-letting -- Defective work -- Cost control -- Final account -- Chapter 11 Target Cost Contracts -- Guaranteed maximum price contracts -- Competition -- Contract -- Advantages and disadvantages -- Use -- Chapter 12 Management and Construction Management Contracts -- Payment and cost control -- Selection and appointment of the contractor -- Contract conditions -- Contract administration.

Professional advisers -- Advantages and disadvantages -- Advantages -- Disadvantages -- Construction management -- Use -- Programme -- Chapter 13 Design and Build Contracts -- The contract -- Where to use DB (and when not to do so) -- Managing the design process -- Novation -- Evaluation of submissions -- Post-contract administration -- Financial administration -- Programme -- Advantages and disadvantages -- Advantages -- Disadvantages -- Chapter 14

Continuity Contracts -- Serial contracting -- Purpose and use -- Operation -- Continuation contracts -- Purpose and use -- Operation -- Term contracts -- Purpose and use -- JCT Measured Term Contract -- Operation -- Chapter 15 Partnering -- A definition -- When to adopt a partnering approach -- The agreement -- JCT Partnering Charter -- JCT Framework Agreement -- JCT constructing excellence -- The partnering workshop -- The benefits -- The risks -- Future of partnering -- Chapter 16 EU Procurement -- Introduction -- The scope of procurement law -- The general principles -- Procedures -- Key principles -- Evaluating tenderers -- Evaluating tenders -- Framework agreements -- Contract change -- Cancellation of the process -- Information obligations debrief and disclosure -- Commencing proceedings -- Remedies -- Complaints to the EU commission and other challenge procedures -- Tendering contracts -- Notes -- Part III Preparing for and Inviting Tenders -- Chapter 17 Procedure from Brief

to Tender -- Initial brief -- Developing the brief -- Feasibility stage -- Sketch scheme -- Costs -- Procurement -- Detailed design -- Programming -- Design team meetings -- Drawings -- Specifications -- Bills of quantities -- Specialist sub-contractors and suppliers -- Quality assurance -- Obtaining tenders -- Chapter 18 Pre-Contract Cost Control -- Introduction -- The purpose of pre-contract cost control.

Framework for pre-contract estimating -- Order of cost estimate -- Information used to prepare an order of cost estimate -- Treatment of on-costs and other costs in order of cost estimates -- Presenting an order of cost estimate -- Cost plans -- Treatment of on-costs and other costs in cost plans -- Presenting a cost plan -- Challenges associated with the production of cost plans -- Cash flow -- Whole life costs -- Summary -- Notes -- Chapter 19 Drawings and Schedules -- The language of drawing -- The changing role of drawings and documents -- Quality -- Standards -- Quality manuals -- Quality procedure codes -- Quality review -- Types, sizes and layout of drawings -- Size -- Layout and revision -- Scale -- Nature and sequence of drawing production -- RIBA Plan of Work 2013 -- Drawings for SBC contracts -- Drawings for design and build or management contracts -- Design intent information -- Computer aided design -- Drawing file formats and translation -- Project extranets -- Contents of drawings -- Survey plan -- Site plan, layout and drainage -- General arrangement -- Elevations of all parts of the building -- Descriptive sections -- Ceiling plans at all floor levels -- Construction details (scale 1 : 20 and 1 : 10) -- Large-scale details (scale 1 : 10 and 1 : 15) -- Schedules -- Drawings and schedules for records -- Notes -- Chapter 20 Specifications -- The use of specifications -- Specifying by prescription -- Specifying by performance -- Specifying by description -- Specification writing -- Decide on format -- Collect information -- Input information -- Check and test -- Deliver -- BIM -- Chapter 21 Building Information Modelling -- The BIM revolution-what is BIM, and who/what is it for? -- The role of government and its BIM strategy -- The levels of BIM adoption -- The BIM journey -- Plan of work, deliverables and work stages.

Loading the model: language and libraries -- Bringing different software programmes together-the search for interoperability -- Operation and maintenance -- Terms of appointment and changes to other business practices -- Level 3 and the future -- Epilogue -- Notes -- Chapter 22 Bills of Quantities -- Tender and contract document -- The wider role -- Basic information -- Preliminaries -- Preambles -- Measured works -- Formats -- Chapter 23 Sub-contractors -- Introduction -- Specialist sub-contractors -- Design by the sub-contractor -- The SBC and sub-contract agreements -- SBC provisions under the main contract -- Chapter 24 Obtaining Tenders -- Introduction -- Tender list -- Preliminary enquiry -- Tender documents and invitation -- Tender period -- Tender compliance -- Late tenders -- Opening tenders -- Examination and adjustment of the priced document -- Negotiated reduction of a tender -- Notification of results -- Tender analysis -- E-Tendering -- Part IV Contract Administration -- Chapter 25 Placing the Contract -- Preparing and signing the contract documents -- Sectional completion -- Contractor's designed portion -- Executing the contract -- Performance bonds and parent company guarantees -- Collateral warranties -- Third party rights -- Issue of documents -- Insurances -- Chapter 26 Meetings -- Initial meeting -- Introductions -- Factors affecting the carrying out of the works -- Programme -- Sub-

contractors and suppliers -- Lines of communication -- Financial matters -- Procedure to be followed at subsequent meetings -- Contractor's meetings -- Employer's meetings -- Chapter 27 Site Duties -- The architect on site -- The architect's duty of inspection and supervision -- Supervision and Inspection duties -- Routine site visits -- Consultants' site visits -- Inspections by statutory officials -- Records and reports -- Samples and testing.
Considerate constructors scheme.

Sommario/riassunto

This key text for the building team is an authoritative guide and gives a detailed account of the team's roles and responsibilities, with best industry practice required to ensure that building projects meet clients' expectations on time, cost and quality. The second edition of The Aqua Group Guide to Procurement, Tendering and Contract Administration has been edited, enlarged and updated by a high-profile author team with unparalleled experience of both private and public sectors, as well as of teaching on QS courses. It covers the entire building process from inception to final account and throughout, the emphasis is on current best practice. This edition has new material on the CDM regulations; JCT contracts; the RIBA Plan of Work; the RICS New Rules of Measurement; BIM; and Sustainability - as well as a general update for industry changes, especially on procurement; internationalisation; and PFI. With clear and thorough explanations, you are taken through self-contained chapters covering the detail of the briefing stage, procurement methods, tendering procedures, and contract administration. The period from starting a college course to successful completion of professional examinations represents a long and steep learning curve. The range of skills and the knowledge required to perform work efficiently and effectively might, at first, seem rather daunting. Although designed as an introductory textbook for undergraduates in construction, architecture and quantity surveying, The Aqua Group Guide offers an excellent overview of contract administration and will provide you with sufficient understanding to hold you in good stead for your early years in professional practice.
