

1. Record Nr.	UNINA9910958154003321
Titolo	The Holocene // H.E. Wright, Jr., editor
Pubbl/distr/stampa	London, : Longman, 1983
ISBN	9780816664955 1-4356-0553-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xiv, 407 pages) : illustrations, maps
Collana	Late-Quaternary environments of the United States ; ; 2
Altri autori (Persone)	WrightH. E <1917-> (Herbert Edgar) PorterStephen C
Disciplina	551.7/9/0973
Soggetti	Geology, Stratigraphic - Quaternary Geology - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographies.
Nota di contenuto	Contents; Contributors to This Volume; Preface; Introduction; Physical Geology; Paleoecology; Environmental Archaeology; Climatology
Sommario/riassunto	To many, the Pleistocene Epoch, which constitutes the earlier and major part of the Quaternary Period, is synonymous with the glacial ages and is viewed as a time of dramatic environmental change. Although there now is abundant evidence that glaciations occurred not only during the Pleistocene but through much of the Tertiary Period as well, and therefore are more appropriately considered as late-Cenozoic phenomena.
