

1. Record Nr.	UNINA9910958160003321
Titolo	Ethnography for a data-saturated world / edited by Hannah Knox and Dawn Nafus
Pubbl/distr/stampa	Baltimore, Maryland : , : Project Muse, , 2019 Baltimore, Md. : , : Project MUSE, , 2019 ©2019
ISBN	9781526127617 152612761X 9781526127600 1526127601
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xiii, 279 pages) : illustrations
Collana	Materialising the digital
Disciplina	306.0285
Soggetti	Ethnology - Data processing Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Data scientists : a new faction of the transnational field of statistics / Francisca Gromme, Evelyn Ruppert and Baki Cakici -- Becoming a real data scientist : expertise, flexibility and lifelong learning / Ian Lowrie -- Engineering ethnography / Kaiton Williams -- 'If everything is information' : archives and collecting on the frontiers of data-driven science / Antonia Walford -- Baseless data? Modelling, ethnography and the challenge of the anthropocene / Hannah Knox -- Operative ethnographies and large numbers / Adrian Mackenzie -- Transversal collaboration : an ethnography in/of computational social science / Mette My Madsen, Anders Blok and Morten Axel Pedersen -- The data walkshop and radical bottom-up data knowledge / Alison Powell -- Working ethnographically with sensor data / Dawn Nafus -- The other ninety per cent : thinking with data science, creating data studies / Joseph Dumit interviewed by Dawn Nafus.
Sommario/riassunto	This edited collection aims to reimagine and extend ethnography for a data-saturated world. The book brings together leading scholars in the social sciences who have been interrogating and collaborating with data

scientists working in a range of different settings. The book explores how a repurposed form of ethnography might illuminate the kinds of knowledge that are being produced by data science. It also describes how collaborations between ethnographers and data scientists might lead to new forms of social analysis
