Sommario/riassunto	This volume brings together 11 original papers on a variety of themes in Greek linguistics, covering phonology, morphology, syntax, and semantics, both synchronically and diachronically. Collectively, these papers report on recent advances in the study of Greek grammar within the framework of generative grammar, and provide insights into such diverse topics as the analysis of consonant clusters, the representation of stress, the status of inflectional features, the relationship between compounds and projection, derived nominals, the occurrence of weak clitic pronouns in questions, small clauses
