Sommario/riassunto	HauptbeschreibungThis book covers policy proposals and interim contracts, assesses the positions of various Iraqi political actors and examines the potential significance for international foreign policy goals in Iraq. Despite a lack of progress in reaching agreements on the hydro-carbon sector and revenue sharing legislation to set new conditions for the management of the country's significant oil and gas resources, development in Iraq's oil and gas sector is moving forward. The passage of the oil and gas sector framework and revenue sharing legislation will be seen as signifi
