	Nota di bibliografia	Includes bibliographical references and indexes.
	Nota di contenuto	Book Cover; Title; Contents; List of figures; Notes on contributors; Series editor's preface; Foreword Shifting contexts; Forgotten knowledge; Exhibiting knowledge: the trees of Dubois, Haeckel, Jesse and Rivers at the Pithecanthropus centennial exhibition; Building, dwelling, living: how animals and people make themselves at home in the world; Transformations of identity in Sepik warfare; Human rights and moral knowledge: arguments of accountability in Zimbabwe; Globalisation and the new technologies of knowing: anthropological calculus or chaos? Cultures in collision: the emergence of a new localism in academic researchThe nice thing about culture is that everyone has it; Afterword Relocations; Name index; Subject index
	Sommario/riassunto	To suppose anthropological analysis can shift between global and local perspectives may well imply that the two co-exist as broader and narrower horizons or contexts of knowledge. The proof for this can be

found in ethnographic accounts where contrasts are repeatedly drawn between the encompassing realm and everyday life or in value systems which sumultaneously trivialise and aggrandise or in shifts between what pertains to the general or to the particular.
