Lambooy and Frank G. van Oort -- Policy competition in theory and practice / Ruud A. de Mooij, Joeri Gorter and Richard Nahuis -- Clustering, optimum currency areas and macroeconomic policy / Roel Beetsma and Koen Vermeylen.
Sommario/riassunto	The 'new economic geography' is one of the most significant developments to have occurred in economics in recent years. The new insights gained from this approach have been successfully applied to issues such as globalization, international integration and policy competition. Contributed to and edited by leading international academics, this topical book analyzes the research inspired by this 'new economic geography' and examines the ensuing policy implications. Issues that are connected to this approach such as core-periphery patterns, transportation costs and economic modelling are also e
