

1. Record Nr.	UNINA9910958616103321
Autore	Zupan Jelka
Titolo	Neonatal and perinatal mortality : country, regional and global estimates // [prepared by Jelka Zupan and Elisabeth Ahman]
Pubbl/distr/stampa	Geneva, : World Health Organization, c2006
ISBN	1-280-50335-1 9786610503353 1-4237-9011-1 92-4-068104-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (75 p.)
Altri autori (Persone)	AhmanElisabeth
Disciplina	614.5/992392
Soggetti	Newborn infants - Mortality Perinatal death Stillbirth
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Preliminaries -- Contents -- 1 Introduction -- 2 Neonatal and perinatal mortality -- 3 Definitions and rates: statistics for international comparison -- 4 Sources of perinatal and neonatal mortality data -- 5 Methodology to estimate rates of neonatal and perinatal mortality -- 6 Calculating rates and numbers by country and region, and globally -- 7 Estimates of perinatal and neonatal mortality: analysis and interpretation -- 8 The way forward -- 9 References -- Annex 1: Country estimates -- Annex 2: Estimates by WHO region and subregion -- Annex 3: Extract from the International statistical classification of diseases and related health problems, 10th revision (ICD-10) -- Annex 4: Estimating neonatal and early neonatal mortality rates when data were not available -- Annex 5: Confidence intervals for neonatal and early neonatal mortality rates -- Annex 6: Estimating stillbirth rates when data were not available -- Annex 7: Estimating intrapartum stillbirth rates -- Annex 8: Male-to-female ratio in neonatal, early neonatal and stillbirth mortality -- Annex 9: Countries and territories grouped by United Nations and WHO regions.
Sommario/riassunto	This report provides neonatal and perinatal mortality estimates by

country, regional groupings and globally. For countries that do not have data, models were developed to estimate mortality. Since data on deaths come from a number of different sources, the methods used to obtain the estimates are also described. Country-specific estimates of stillbirth and early neonatal deaths are published here for the first time. Estimates of stillbirth deaths that occur during delivery (intrapartum) by regional groupings, as well as estimates of sex ratio in neonatal, early neonatal and stillbirth mortality for the developing world are other recent contributions to the understanding of early mortality that are presented in this book. This publication will allow countries to review their achievements in the area of maternal and neonatal health and compare their results with those obtained by other countries. It is hoped that these estimates will stimulate interest in routine data collection and stress the need for better data to inform and monitor change.
