Sommario/riassunto

A social reality (including social pathology) is constantly being constructed anew in the process of confrontation of perspectives and definitions of individuals, institutions and social groups. Therefore what interests the authors of the book more than the disputes on the right definition, is the understanding of social pathology phenomena - their causes, mechanisms, and social costs. Complex and multidimensional as it is, social reality is best described from various perspectives. For that reason, a potentially interesting and fruitful interdisciplinary approach characterises the book. It contains mainly texts of psychologists who work at the Jagiellonian University in Cracow. The articles of sociologists, lawyers, and one theoretician of education broaden the horizon and thus contribute new insights to the entirety of the book. The body of articles predominantly relates to Polish reality, as well as stems from the experience of the Polish society in the period of political transformation. No less interesting are the articles on the pathology of political discourse, community-policing problems in France, and issues of social concern (victims of violence, problems of the elderly, and collective behaviour). The volume is of interest for social scientists and professionals as well as for students.

Sommario/riassunto

This collection in honor of creolist Charlene Junko Sato (1951-1996) brings together contributions by leading specialists in pidgin-creole studies in three primary areas: Pidgin-Creole Genesis and Development; Attitudes and Education, and Creole Discourse and Literature. The varieties covered come from English, French and Spanish lexical bases and from places as far apart as Africa, Australia, Hawaii, and the Caribbean. Editors Rickford and Romaine introduce each of the papers and provide a biography and bibliography of Sato.
