Sommario/riassunto	In this path-breaking history of manhood and masculinity, Angus McLaren examines how nineteenth- and twentieth-century western society created what we now take to be the traditional model of the heterosexual male. "Inherently interesting. . . . Exhibitionism, pornography, and deception all have their place here."-Library Journal "An appealing wealth of evidence of what trials can reveal about the boundaries of men's roles around the turn of the century."-Kirkus Reviews "It is difficult to imagine a better guide to the most notorious scandals of our great-grandparents' day."-Graham Rosenstock, Lambda Book Report

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Basic principles and applications of photopolymerization reactions -- pt. 2. Radical photoinitiating systems -- pt. 3. Nonradical photoinitiating systems -- pt. 4. Reactivity of the photoinitiating system.
Sommario/riassunto	Photoinitiating systems for polymerization reactions are largely encountered in a variety of traditional and high-tech sectors, such as radiation curing, (laser) imaging, (micro)electronics, optics, and medicine. This book extensively covers radical and nonradical photoinitiating systems and is divided into four parts: Basic principles in photopolymerization reactions; Radical photoinitiating systems; Nonradical photoinitiating systems; Reactivity of the photoinitiating

system. The four parts present the basic concepts of photopolymerization reactions, review all of the available photoinitiating systems and deliver a thorough description of the encountered mechanisms. A large amount of experimental and theoretical data has been collected herein. This book allows the reader to gain a clear understanding by providing a general discussion of the photochemistry and chemistry involved. The most recent and exciting developments, as well as the promising prospects for new applications, are outlined.
